Projektu veidi

The following activities are generally eligible for grants under Horizon Europe:

Research and innovation actions (RIA) — Activities that aim primarily to establish new knowledge or to explore the feasibility of a new or improved technology, product, process, service or solution. This may include basic and applied research, technology development and integration, testing, demonstration and validation of a small-scale prototype in a laboratory or simulated environment.

Innovation actions (IA) — Activities that aim directly to produce plans and arrangements or designs for new, altered or improved products, processes or services. These activities may include prototyping, testing, demonstrating, piloting, large-scale product validation and market replication.

Coordination and support actions (CSA) — Activities that contribute to the objectives of Horizon Europe. This excludes R&I activities, except those carried out under the ‘Widening participation and spreading excellence’ component of the programme (part of ‘Widening participation and strengthening the European Research Area’). Also eligible are bottom-up coordination actions which promote cooperation between legal entities from Member States and Associated Countries to strengthen the European Research Area, and which receive no EU co-funding for research activities.

Programme co-funded actions (CoFund) — A programme of activities established or implemented by legal entities managing or funding R&I programmes, other than EU funding bodies. Such a programme of activities may support: networking and coordination; research; innovation; pilot actions; innovation and market deployment; training and mobility; awareness raising and communication; and dissemination and exploitation. It may also provide any relevant financial support, such as grants, prizes and procurement, as well as Horizon Europe blended finance¹³ or a combination thereof. The actions may be implemented by the beneficiaries directly or by providing financial support to third parties.

Innovation and market deployment actions (IMDA) — Activities that embed an innovation action and other activities necessary to deploy an innovation on the market. This includes the scaling-up of companies and Horizon Europe blended finance.

Training and mobility actions (TMA) — Activities that aim to improve the skills, knowledge and career prospects of researchers, based on mobility between countries and, if relevant, between sectors or disciplines.

Pre-commercial procurement actions (PCP) — Activities that aim to help a transnational buyers’ group to strengthen the public procurement of research, development, validation and, possibly, the first deployment of new solutions that can significantly improve quality and

Public procurement of innovative solutions actions (PPI) — Activities that aim to strengthen the ability of a transnational buyers’ group to deploy innovative solutions early by overcoming the fragmentation of demand for such solutions and sharing the risks and costs of acting as early adopters, while opening market opportunities for industry. Eligible activities include preparing and implementing, under the coordination of a lead procurer, one joint or several coordinated PPI by the buyers’ group and additional activities to embed the PPI into a wider set of demand-side activities.

Maksimālā atbalsta intensitāte pa projekta veidiem

- Innovation action: 70% (except for non-profit legal entities, where a rate of up to 100% applies)

Budget categories and cost eligibility rules

The budget categories and cost eligibility rules are fixed in the grant agreement (*Data Sheet, point 3 and article 6*).

Budget categories:

- actual costs (i.e. costs which are real and not estimated or budgeted) for:
 - personnel costs (unless declared as a unit cost; see below);
 - subcontracting costs;
 - purchase costs (unless declared as a unit cost; see below); and
 - costs of providing financial support to third parties (if provided for in the specific call conditions);
- units (i.e. an amount per unit) for:
 - personnel costs of SME owners/natural persons not receiving a salary;
 - personnel costs calculated by the beneficiaries according to their usual cost accounting practices (average personnel costs);
 - costs of internally invoiced goods and services calculated by the beneficiaries according to their usual cost accounting practices; and

- specific unit costs (if provided for in the specific call conditions; see also Annex 2a of the grant agreement);
- flat-rate (i.e. costs calculated by applying a percentage fixed in advance to other types of eligible costs) for:
 - indirect costs (25% flat-rate of the total eligible direct costs, excluding eligible direct costs for subcontracting, financial support to third parties and any unit costs or lump sums which include indirect costs);
- lump sum (i.e. a global amount deemed to cover all costs of the action or a specific category of costs, if provided for in the specific call conditions).

Within a grant, different forms of costs can be used.

Costs can also be declared under several EU Synergy grants, if provided for in the specific call conditions and the funding under the grants does not exceed 100% of the costs and contributions declared to them.

Application Form (Part A)

Structure of the Proposal

The proposal contains two parts:

- **Part A** of the proposal is generated by the IT system. It is based on the information entered by the participants through the submission system in the Funding & Tenders Portal. The participants can update the information in the submission system at any time before final submission.
- **Part B** of the proposal is the narrative part that includes three sections that each correspond to an evaluation criterion. Part B needs to be uploaded as a PDF document following the templates downloaded by the applicants in the submission system for the specific call or topic. The templates for a specific call may slightly differ from the example provided in this document.

The electronic submission system is an online wizard that guides you step-by-step through the preparation of your proposal. The submission process consists of 6 steps:

- Step 1: Logging in the Portal
- Step 2: Select the call, topic and type of action in the Portal
- Step 3: Create a draft proposal: Title, acronym, summary, main organisation and contact details
- Step 4: Manage your parties and contact details: add your partner organisations and contact details.
- Step 5: Edit and complete web forms for proposal part A and upload proposal part B
- Step 6: Submit the proposal

This template is to be used in a single-stage submission procedure or at the 2nd stage of a two-stage submission procedure.

The structure of this template must be followed when preparing your proposal. It has been designed to ensure that the important aspects of your planned work are presented in a way that will enable the experts to make an effective assessment against the evaluation criteria. Sections 1, 2 and 3 each correspond to an evaluation criterion.

Please be aware that proposals will be evaluated as they were submitted, rather than on their potential if certain changes were to be made. This means that only proposals that successfully address all the required aspects will have a chance of being funded. There will be no possibility for significant changes to content, budget and consortium composition during grant preparation.

⚠ Page limit: The title, list of participants and sections 1, 2 and 3, together, should not be longer than 30 pages. For topics using lump sum funding, the limit is 33 pages. All tables, figures, references and any other element pertaining to these sections must be included as an integral part of these sections and are thus counted against this page limit. The number of pages included in each section of this template is only indicative.

The page limit will be applied automatically. **At the end of the document, you can see the structure of the actual proposal that you need to submit, please remove all instruction pages that are watermarked.**

If you attempt to upload a proposal longer than the specified limit before the deadline, you will receive an automatic warning and will be advised to shorten and re-upload the proposal. After the deadline, excess pages (in over-long proposals/applications) will be automatically made invisible and will not be taken into consideration by the experts. The proposal is a self-contained document. Experts will be instructed to ignore hyperlinks to information that is specifically designed to expand the proposal, thus circumventing the page limit.

Please, do not consider the page limit as a target! It is in your interest to keep your text as concise as possible, since experts rarely view unnecessarily long proposals in a positive light.

⚠ The following formatting conditions apply.

The reference font for the body text of proposals is Times New Roman (Windows platforms), Times/Times New Roman (Apple platforms) or Nimbus Roman No. 9 L (Linux distributions).

The use of a different font for the body text is not advised and is subject to the cumulative conditions that the font is legible and that its use does not significantly shorten the representation of the proposal in number of pages compared to using the reference font (for example with a view to bypass the page limit).

The minimum font size allowed is 11 points. Standard character spacing and a minimum of single line spacing is to be used. This applies to the body text, including text in tables.

Text elements other than the body text, such as headers, foot/end notes, captions, formula's, may deviate, but must be legible.

The page size is A4, and all margins (top, bottom, left, right) should be at least 15 mm (not including any footers or headers).

This document is tagged. Do not delete the tags; they are needed for our internal processing of information, mostly for statistical gathering. In that light, please do not move, delete, re-order, alter tags in any way, as they might create problems in our internal processing tools. Tags do not affect or influence the outcome of your application.

Standard Application Form (HE RIA, IA)

Application form (Part A)
Project proposal – Technical description (Part B)

Structure of the Proposal

The proposal contains two parts:

- **Part A** of the proposal is generated by the IT system. It is based on the information entered by the participants through the submission system in the Funding & Tenders Portal. The participants can update the information in the submission system at any time before final submission.
- **Part B** of the proposal is the narrative part that includes three sections that each correspond to an evaluation criterion. Part B needs to be uploaded as a PDF document following the templates downloaded by the applicants in the submission system for the specific call or topic. The templates for a specific call may slightly differ from the example provided in this document.

The electronic submission system is an online wizard that guides you step-by-step through the preparation of your proposal. The submission process consists of 6 steps:

- Step 1: Logging in the Portal
- Step 2: Select the call, topic and type of action in the Portal
- Step 3: Create a draft proposal: Title, acronym, summary, main organisation and contact details
- Step 4: Manage your parties and contact details: add your partner organisations and contact details.
- Step 5: Edit and complete web forms for proposal part A and upload proposal part B
- Step 6: Submit the proposal

Proposal template Part B: technical description

(for full proposals: single stage submission procedure and 2nd stage of a two-stage submission procedure)

AR KO SĀKT- PROJEKTU RAKSTĪŠANĀ?

- Nelielās komandās vai grupās pārrunājam idejas;
- Dalāties ar informāciju par projektu konkursiem vai iespējām;
- Savlaicīgi izpētām dalības nosacījumus un kritērijus programmās un tematikās, sekojam līdz regulārajiem konkursiem (nedaudz atšķirsies nosacījumi, pamat lietas bieži nemainīgas) (HE, FLPP, ERA-NET, COST)

TURPINĀM.....

Izvērtējam ar ko kopā startēt, vai kāds jāuzrunā kā **organizācija** – vai kā fiziska persona **cilvēks-speciālists**?

Ja kā organizācija – **būs projektā partneris** – un jādalās ar darbiem, atbildību un budžetu- RTU, LU, vai cita organizācija (FLPP tad tikai Zinātniskā institūcija, ja citas programmas projekts vairāk jādomā sadarbība no vienas valsts partnerības ar dažāda veida organizācijām – Augstskola, Zinātniskais institūts, Industrija, MVU, biedrība, asociācija utt.

Ja kā cilvēks – **speciālists**- jāzin, kā varēs pieņemt darbā savā organizācijā un kādā statusā- viespētnieks, inženieris, eksperts , laborants vai cits amats atbilstoši organizācijas lietotajām amatu saimēm un darba uzdevumiem projektā

DARBS KOMANDĀ UN TAS IR SPĒKS

Vienmēr meklējam savai idejai kompetentus-
zinošus partnerus (atbilstoši konkursa
nosacījumiem), un sadalām plānoto darbu un
aktivitātes («Dzirdīgs ausis un atbalsta plecu»)

Tad arī rezultāts neizpaliks 😊

ERA Talents darbības joma

- ERA Talents darbības mērķis ir veicināt pētniecības un inovācijas talantu karjeras iespējas, kā arī sadarbības un nodarbinātības iespējas dažādās nozarēs, galveno uzmanību pievēršot paplašināšanas valstīm. Paredzams, ka projekti veicinās vairākus no turpmāk minētajiem rezultātiem:
- Stiprāka cilvēkkapitāla bāze pētniecības un inovācijas jomā paplašināšanās valstīs, kurā ir vairāk uzņēmīgu un labāk apmācītu pētnieku, inovatoru un citu pētniecības un inovācijas talantu;
- līdzsvarotāka talantu aprīte gan ģeogrāfiskā, gan starpnozaru mērogā;
- Palielinātas pētniecības un inovācijas spējas un pētniecības un inovācijas atbalsta spējas, kā arī ieguldījums pētniecības organizācijas izcilības paaugstināšanā paplašināšanās valstīs;
- Strukturētāka un ietekmīgāka sadarbība starp akadēmiskajām organizācijām un uzņēmumiem;
- Palielināts pētniecības, uzņēmējdarbības un citu pārnesamu prasmju un kompetenču kopums;
- Uzlabotas nodarbinātības iespējas un ilgtspējīgas karjeras perspektīvas dažādiem talantiem akadēmiskajā vidē, rūpniecībā un ārpus tās.

ERA Talents darbības joma

- Starpnozaru talantu aprite un akadēmisko aprindu un uzņēmumu sadarbība zināšanu nodošanai prasa sistematizēt un strukturēt to. Ar ERA4You, kas ir viens no ERA politikas pasākumiem, Eiropas Komisijas mērķis ir atbalstīt un stimulēt šādas pārmaiņas, lai panāktu līdzsvarotāku talantu apriti gan starpvalstu, gan starpnozaru līmenī. Šajā jomā ERA Talents mērķis ir atbalstīt pētnieku, inovatoru un citu pētniecības un inovācijas talantu apmācību un mobilitāti starp nozarēm, īpašu uzmanību pievēršot paplašināšanas valstīm. Dotācija sedz izdevumus, kas saistīti ar ERA Talents iesaistītajām organizācijām un atsevišķiem uzņemtajiem/norīkotajiem talantiem (administratīvās izmaksas, mācību izmaksas, ceļa un uzturēšanās izmaksas un algas norīkotajiem darbiniekiem, kā arī izmaksas, kas saistītas ar izplatīšanu, komunikāciju un zināšanu nodošanu).

HAMK AS AN ORGANISATION

HAMK is a multidisciplinary, workplace-oriented higher education institution operating in the Kanta-Häme region of Finland. Together with our students, we are a community of 10 000 working in the fields of bioeconomy, business, design, education, health, and technology. Our mission is to be the most inspiring and work-place oriented university of applied sciences in Finland.

Our four research units, namely HAMK Edu, HAMK Bio, HAMK Tech, and HAMK Smart, coordinate around 130 research projects annually together our active network of local, national, and international partners. The research units' pooled competence builds our innovation ecosystem. Our research units focus on **Smart Systems and Biotechnology**, **Smart Sustainable Built Environment**, and **Smart Future Education and Capacity Building**. These ecosystems are supported by our diverse research infrastructure that includes **laboratory facilities**, such as a Robotics Lab at our Riihimäki Campus, a 1500 m² mechanics laboratory for structural testing of building elements and a state-of-the-art biotechnology laboratory at our Hämeenlinna Campus, as well as **research environments**, such as 1 800 hectares of observation forest at our Evo Campus, experimental greenhouses at our Lepaa Campus, and a Lighthouse-designated organic farm at our Muonio Campus. We are also a part of **RUN European University** which brings together eight European higher education institutions from seven different countries.
