**Company culture app**  
www.motivio.eu

**Problem**

**01** Attracting and retaining talent is one of the top 3 concerns for businesses. Companies spend millions on employee benefits to tackle this problem.

**02** But employee turnover ratio is rising. Up by 48% in 4 years.

**03** To attract young talent today, companies must adapt to the needs, expectations and motivations of the new, mobile first generation. Old methods don't work for them!

**Solution**

**Company culture app Motivio.**

Tools to build company culture that attracts and retains new generation employees like a magnet:

**01** Build social team ties with gamification and micro team building

**02** Encourage appreciation and peer rewards

**03** Deliver relevant employee benefits

**04** Run internal communications – pulse surveys, announcements and more.

It consists of mobile app for employees and web portal for management.

**Market**

**SAM:** 22 000 medium and large companies in Baltics and Nordics.

**SOM:** We aim to get 10% of that market in 3 years – 2200 companies. With our business model it will provide € 25 million revenues. Our future vision includes other countries.

**Competition**

Contrary to incumbents Sodexo and Edenred, we focus on Millennial workers and nonfinancial motivating tools.

Contrary to employee engagement tools like Fand.co, Peopleart and other tools, we focus on continuous teambuilding with gamification and other tools.

**Co-Founders**

**Ansis Lipenits** CEO. Born to create. Founded and sold 2 software companies.

**Dita Daukste** COO. Growth rocket. Developed insurance business in 8 countries.

**Juris Bluzmanis** CTO. Rare species. Great coder and manager. Lattelecom BPO team lead.

**Advisory board**

**Herve Combal.** Before: Edenred, GM.

**Andrejs Strods.** Before: Benebay, founder/ceo.

**Progress**

**Self-funded MVP**

Qualified leads with 100-1500 employees (Swedbank, All Media Baltics, Inspired, etc)

**Seeking**

**€ 250 000 investment**

For product development and sales.

**Business model**

**Tiered pricing model:**

**€ 3-6 employee/month** depending on company size.

E.g., a customer with **1000 employees = 3000 MRR.**

**Former funding**

MVP development self-funded

**€ 20 000 investment** from Startup Wise Guys accelerator.

**€ 50 000 equity free EU funds grant**

**€ 20 000 equity free Google cloud grant**

**Roadmap**

**2018**

Get € 250 000 investment in Q2-Q3

Scale development team for further product development

Continue product development

Launch marketing campaign in Q2

Reach MRR € 4500 in December in Latvia.

**2019**

Scale to Sweden. Reach MRR € 50000 by December 2019.

**Contacts:** Ansis Lipenits CEO, +371 2 458 9196, skype: ansis.lipenits

**Specialized online video consultation platform for clinics and health centres**

**SUMMARY**

We provide IT solution that increases availability of primary health care for a wider range of society through modern technologies. Our company has developed an online platform which allows to clinics to increase income and manage daily processes more easily. Beside competitive IT solutions, we provide our clients with expertise, fast implementation and consultations. Company started on May 2017.

**TEAM**

Consists of Founder, Board member, Gregory Gluskin: 20-year background in international business development, development executive, Santa Banga: 12-year background in sales and project development and IT team: 10+ years in IT market, 60+ IT professionals, 130+ successfully implemented projects;

**ADVISORS**

Project is being advised by several clinics, "Veselības centrs 4" one of the biggest health chain in Latvia, "ALMA clinic", "VIA UNA", "Miega slimību centrs".

**CUSTOMER PROBLEM**

Many clinics around the world are not able to receive additional income via phone or video consultations, the development of internal IT solution is costly and difficult, clinics and health centres suffer from such problems as cancelled consultation and other issues caused by patients.

**FINANCIALS**

Total investment up till now is more than **140 000 EUR** by the founder.

Current burn rate is approx. **10 000 EUR.**

Company has successfully launched 1st project in June 2018.

**SOLUTION**

Telemedicine platform as a service which includes online video consultation software, clinic administration tools, marketing support. Fully customisable system under clinic brand and accessible via web, android and iOS platforms. Our product increases value of base products, number of clients and their engagement, as well as reducing operational costs.

**BUSINESS MODEL**

Selling white label platform on subscription basis and additional services.

**TARGET MARKET**

Germany, Belgium and other central Europe countries legally supporting telemedicine services. Company has already doing marketing in exhibitions and active sales in Germany.

**CUSTOMER**

Our target customers are clinics and health centres in central Europe providing professional health services (consultations) with more than 100 doctors in such fields as cardiology, gynaecology etc.

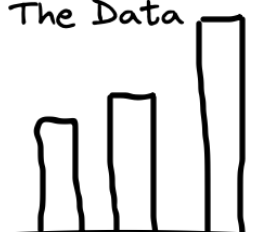

**INVESTMENT OFFER**

Company is looking for investment of 700 000 EUR in two tranches for further sales and marketing development into target markets at pre-money valuation of 8M EUR.

**CONTACTS** Santa Banga | santa.banga@doonline.lv | +371 25669905 | Riga, Latvia

## PIEMĒRI

P-Agro develops and manufactures an environmentally friendly mineral material called Letonite, specifically designed to facilitate phosphorus (P) recovery from wastewater. Following circular economy principles, Letonite is beneficial as fertilizer without further after-treatment.

DoRac is a metaverse space crypto Play-to-Earn game, where participants will be able to take part in a hippodrome. They can buy, sell, breed, and train digital doges in a form of smart NFTs with dynamic stats that will make every doge unique.

### SUMMARY

We provide IT solution that increases availability of primary health care for a wider range of society through modern technologies. Our company has developed an online platform which allows to clinics to increase income and manage daily processes more easily. Beside competitive IT solutions, we provide our clients with expertise, fast implementation and consultations. Company started on May 2017.

## Your IT Partner For Earth and Beyond

We provide dependable support to build your critical IT infrastructure from cloud deployment and support to solution integration. DATI Group has more than 30 years of experience delivering locally and internationally significant data storage, management, and system integration projects.

# Problēma

## PROBLEM

PIEMĒRI

### What We Do

We create instant and significant cost savings of 10% to 40% for our clients at the cost of a fraction of these savings. The more challenging the market conditions, the bigger the competitive advantage we bring to our clients.

### How We Do It

We increase the efficiency and productivity of businesses operating movable and fixed technical assets (e.g. trucking fleets) by providing world class integrated telemetry, remote monitoring, and control solutions for smart growth of business profitability.

### Why Now

The cost of doing business has been skyrocketing since 2022, while the market demands customer price reductions, which squeeze the bottom line even more. We offer insights on how to improve cost efficiency across consumable inputs, spare parts, asset utilization, and human resources by up to 40%. This ensures that businesses remain profitable during these times of unprecedented external challenges.

#### Reducing costs is a top priority for CFOs

Priority	Percentage
Reducing costs	45%
Increasing cashflow	40%
Introducing new products and services	25%

#### Cumulative Global Inflation Trend

Year	Inflation Trend (%)
2014	0%
2016	~10%
2018	~20%
2020	~30%
2022	~40%

## PROBLEM

Adaptive Optics (AO) is a technology used to improve the performance of optical systems. Its main component is wavefront sensor. **The problem with adaptive optics is their size and high costs, especially in astronomy.**

Traditional systems in astronomy use extremely expensive laser guide stars which can afford only professional observatories. In microbiology, diffuse environment (emersion oil, liquids) is somewhat like atmospheric turbulence which create distortions of the images. To improve this, novel technological approach shall be applied.

## PLATIO ecosystem – manage your crypto, fiat and stocks all in one place

PLATIO Smart Banking Ecosystem has two new types of smart-contracts: **Asset Guard** and **Smart Escrow**, which benefits to crypto holders, customers paying with crypto, merchants and service providers accepting it as a mean of payment.

### Asset Guard

Asset Guard is a smart contract-based solution for protection users' crypto, fiat and stocks, stored in PLATIO Ecosystem against possible risks caused by high market volatility or access loss (key loss, disability or death).

### Smart Escrow

Smart Escrow is a smart contract-based solution for all types of deals in crypto, fiat and stocks with conflict resolution opportunity. It proceeds the payment to the seller when the deal parameters are met, and the buyer confirms product or service receipt.

### Banking for crypto users

PLATIO users have an access to the Smart Banking Ecosystem supporting three types of assets: crypto, fiat and stocks. Exchange your crypto into fiat or stocks, make payments in crypto. PLATIO users are free to use their assets as they want.

## Technological Capabilities :

- Utilizing commercial physicochemical sensors, we have built pilot equipment for on-site water data mining. This equipment is portable, user-friendly, and facilitates water quality monitoring in various locations.
- We have established a testing infrastructure for data storage, labelling, and processing that ensures convenient access for data validation and analysis.
- Our team has developed a suite of proof-of-concept solutions that include algorithms for detecting anomalies in sensor readings, identifying water contamination events, classifying types of contamination sources, and estimating the probability of biological contamination. These innovations provide a solid foundation for collaboration within larger consortia.
- Our preliminary water quality datasets comprise over 10 million labeled data points, available to prototype AI's capabilities in water quality assessment.
- Over the past 5 years, our team has developed a methodology and system for creating, labeling, and harmonizing water quality datasets tailored for AI training purposes.

## Solution

Company culture app Motivio.

Tools to build company culture that attracts and retains new generation employees like a magnet:

- 01** Build social team ties with gamification and micro team building
- 02** Encourage appreciation and peer rewards
- 03** Deliver relevant employee benefits
- 04** Run internal communications – pulse surveys, announcements and more.

It consists of mobile app for employees and web portal for management.

## IEGUVUMI ĢIMENĒ

**BĒRNIEM** – Aizraujošs un jautrs veids jaunu prasmju apgūšanā. Kopumā attīsta bērnu.

- Nedalīta uzmanība no vecākiem (šeit un tagad)
- Uzlabo sociālās prasmes un trenē atjautību
- Attīstīta fantāziju
- Palīdz noformulēt domu un izteikties precīzi

**VECĀKIEM** – Universāls rīks kontaktam ar bērnu jebkurā vietā un laikā.

- Personīgs kontakts ar bērnu
- Spēles gaitā vecāki uzklausa bērnu, sadzird, kas bērnam ir aktuāls
- Starp vecāku un bērnu veidojas stiprāka emocionālā satuvināšanās

## SOLUTION

Telemedicine platform as a service which includes online video consultation software, clinic administration tools, marketing support. Fully customisable system under clinics brand and accessible via web, android and iOS platforms. Our product increases value of base products, number of clients and their engagement, as well as reducing operational costs.

## Team experience:

-  The team has implemented over 10 studies related to water quality monitoring in their experience. The total research experience on the topic is more than 12 years.
-  More than 60 years of collective experience in the water sector. The team includes water engineers with practical and academic experience in the drinking water industry.
-  Consequently, the team has successfully developed competencies in AI training, IT and data processing infrastructure, as well as in product development and team management.

## Experience & team

- Co-founders with more than 20+ years of experience in advanced material commercialisation and science intensive business development fields
- The Chief Scientist specializes in Physical Chemistry and holds numerous patents
- An Advisory Board member provides 30+ years of expertise in the water management industry

## Reference projects

- ❖ HORIZON 2020 Digitising and transforming European industry and services: digital innovation hubs and platforms «Project Better Factory». Partners from 11 EU countries
- ❖ I3 project «Value4Pack». Partners 15 partners from 12 EU countries
- ❖ COSME Project «DIGICLUSTERS» 2018-2020 European Strategic Cluster Partnerships (ESCP-4i or ESCP-S3)
- ❖ COSME Excellence call COS-CLUSTER-2018-03-02 Project «Safe Smart Food». Partners – Austria, Lithuania, Spain
- ❖ COSME Cluster Go International call COS-CLUSINT-2019-3-01 Project «AUMENTA». Partners – Lithuania, Poland, Spain
- ❖ EISMEA Project «AgriFoodX5.0». Partners – Lithuania, Portugal, Spain
- ❖ Organized more than 600 business meetings with foreign companies for 76 Latvian food producers
- ❖ Organized Latvian food producer group visits to 22 countries – as a result, more than 80 food product deliveries were made to export markets

## Experience

- **Expertise in recovery within chemical and metallurgy sectors**
- **Reuse of recovered materials in chemistry, rubber, and tire industries, allowing to reduce the amount of used material**
- **Participant in EIT Raw Materials KAVA projects**

## Reference Projects

Our infrastructure services are used by organizations like NATO and CERN. In our projects we value collaboration and throughout the years have partnered with VTT, SINTEF, Latvian, Norwegian, Finnish, Belgian and other technical universities in various consortia.

### 2019

Scale to Sweden. Reach MRR € 50000 by December 2019.

## OBSERVE THE UNIVERSE WITHOUT DISTURBANCES AND EXPENSIVE EQUIPEMENT

### PROBLEM

Adaptive Optics (AO) is a technology used to improve the performance of optical systems. Its main component is wavefront sensor. The problem with adaptive optics is their size and high costs, especially in astronomy.

Traditional systems in astronomy use extremely expensive laser guide stars which can afford only professional observatories. In microbiology, diffuse environment (emersion oil, liquids) is somewhat like atmospheric turbulence which create distortions of the images. To improve this, novel technological approach shall be applied.

### SOLUTION

For clients in astronomy our solution will provide possibility to use natural objects saving costs for star imaging and opening new better star imaging opportunities even for amateur astronomers. Whereas, in biology, if proved efficient, the product will considerably increase optical quality control optimizing the costs and size of the scientific equipment.

### COMPETITIVE ADVANTAGES

Main competitive advantages are cost efficiency and improved wavefront correction ability in low image intensity conditions and which are possible to adapt for different industries and optical systems.

### MARKET

Aiming for high level clients and return on investments our target markets are stable growing astronomy market and rapidly developing biotech industry.

### CONTACTS

+371 2632 2263  
email@email.com

MATXsensors.com

### PRODUCT

The product is a new measurement and correction solution for the optical wavefront errors and adaptive optics system aberrations. The most important element is the specific binary mask which encodes the phase of the object being measured.

At the end of the commercialization measures there will be 3 products (technologies) developed for different client needs:

- 1. Highest quality** (for observatories);
- 2. Medium quality** (for smaller observatories, microscopes, individuals astronomers);
- 3. Lowest quality** (for microscopes, individuals astronomers).

Basic components of the technology are binary masks, scientific camera, industry specific optics (e.g. telescope for astronomy or microscope for biology), processing equipment (computer, etc.), and software with custom algorithm.

### Commercialization steps

No.	ACTIVITY	2018	2019	2020	2021
QUARTER		1 2 3 4	1 2 3 4	1 2 3 4	1 2
1	Development of Technical economic pro-research and commercialization strategy				
2	Improvement of wavefront sensor technology				
3	Creation of a wavefront sensor prototype and testing in the US. Astronomical observatory in Baltimore				
4	Adaptation of the technology for each product				
5	Contacts with industry representatives for demonstration of the technology and acquisition of the feedback				
6	Consolidation of property rights				
7	Establishment of a spin-off enterprise, which produces a new generation of wavefront sensors.				

### TEAM

The team of technology commercialization project consists of six people: a project manager, four scientists, and the spin-off enterprise development and technology marketing expert.

When project is launched, the team will join mathematician, a computer specialist as well as an administrative support provider appointed by ISSP UL.

Specialized online video consultation platform for clinics and health centres

POSITION	R&I Director
DATE OF PUBLICATION	24/01/2023

### EXPERTISE OVERVIEW

#### TOPIC(S) OF INTEREST

HORIZON-JTI-CLEANH2-2023-07-01 - Advanced materials for hydrogen storage tanks

#### HEADLINE

Reference in Europe for Net Shape composites manufacturing solutions - Advanced AFP/ATL, RTM & SQRTM processes – 30+ years of R&D

#### POTENTIAL CONTRIBUTION

##### Our engineering expertise and key capabilities, unique resources

- design of Class V solutions for hydrogen storage including innovative part architectures (note: patent pending about multifunctional M&P for optimal tank sealing)
- development plan for increasing both TRL & MRL within a risk mitigation approach
- test matrix definition, manufacturing & testing TP/TS coupons = certification approach

We have the support from **Airbus, ESA, Solvay** and **Teljin** to develop Class V hydrogen storage tanks.

# Your IT Partner For Earth and Beyond

We provide dependable support to build your critical IT infrastructure from cloud deployment and support to solution integration. DATI Group has more than 30 years of experience delivering locally and internationally significant data storage, management, and system integration projects.

## Reference Projects

Our infrastructure services are used by organizations like NATO and CERN. In our projects we value collaboration and throughout the years have partnered with VTT, SINTEF, Latvian, Norwegian, Finnish, Belgian and other technical universities in various consortia.

### System integration and Earth observation

- **NATO** / Development of integration modules between a remotely piloted aircraft and command and control stations for the *Alliance Ground Surveillance System*.
- **State Forest Service of Latvia** / Implementation and management of data storage for a remote wildfire detection and prevention system by *AmpliCam*.

### Cloud development and data management

- **CERN** / Unification of HPC resources from three Latvian academic institutions in a federated cloud platform using the Latvian Academic network infrastructure for the European nuclear research centre *CERN's* computing tasks.
- **The National Library of Latvia** / Cloud computing platform development and deployment utilizing open source solutions for a multi-petabyte data storage, backup, and search engine to preserve Latvian cultural heritage.

### R&D

- **Folding@home** / Donation of HPC computing resources to fight coronavirus in the *Folding@Home Distributed Computing Initiative* as a part of the *CERN Baltic Group*.
- **IPCEI-CIS DigiTDevOps** / Development of a modular digital twin platform in collaboration with *Riga Technical University (RTU)*, *SAP*, *Engineering Ingegneria Informatica*.
